JUNK ART PROPELLER SMALL ROUND COFFEE TABLE

Coffee Tables

The distinctive Junk Art coffee table is handcrafted from the propellers of decommissioned Chinese fishing junks, topped with a simple pane of tempered glass. The reclaimed propeller, which once roared into life over the seas, lends its history and authenticity to these one of a kind pieces. Special Note: A 4-leaf propeller is used in the round large table and a 3-leaf propeller is used in the round small table. Style may vary slightly from piece to piece, due to the different dimensions and shape of each propeller.
